GLOBAL PARTNERS  
EST 2019

---

**European focused asset manager Adelio Partners enters into a distribution agreement with YardHouse Global Partners.**

**Nordic based distribution agent YardHouse Global Partners will support Adelio Partners Ltd. by taking over capital raising and client servicing activities in Nordics, Benelux, and Germany. Adelio launched their first European equity fund as the founders departed from Alken in 2019, after more than 10 years of significant success to set up an independent boutique.**

Adelio's three portfolio managers have now an independent platform to create a true ESG focused and risk-managed European equity strategy true to their vision. Led by CIO, Antoine Badel, the team has over a decade of strong alpha creation together, supported by an ex-Alken trader and COO.

Objective set to no style-bias, the team is actively investing in 35-40 Pan-European stocks. Finding a balance by investing across sectors and combining both value and growth in the portfolio, the team is set out to beat the STOXX 600 index while providing investors with truly superior ESG characteristic. The team has harnessed technology by building their own tool called AQUA to optimize portfolio and risk while controlling for potential behavioural biases.

YardHouse Global Partners is the distribution arm of YardHouse Capital Group based in Copenhagen, serving clients mainly in Nordic, Benelux, and German regions. YardHouse has a track record of raising capital for boutique managers with Sustainable and Emerging Markets strategies. Adelio fits in their setup by complementing Sustainability oriented offering in liquid space.
